Inner lining needle felt

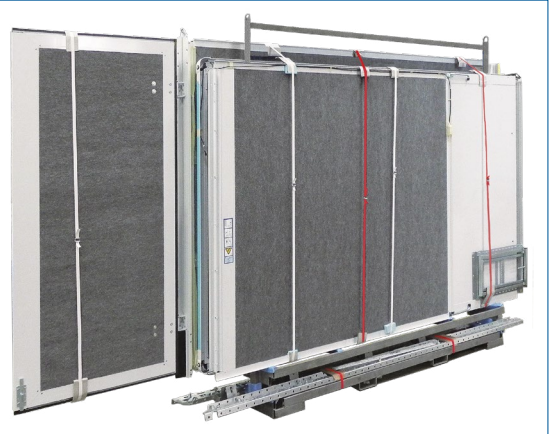

Surface protection with needle felt

When transporting unpacked goods such as e.g. removal goods, it is always a question of **protecting the surfaces of the cargo from damage**.

Felt-covered inner walls with lashing rails embedded in FerroFoam® or AluFoam®, such as the following, have proven their worth to furniture movers for this purpose e. g. rod lashing strips.

Some customers who have already ordered **prefabricated walls with needle felt** report significant savings and optimisation in their production.

- > adapt dimensionally accurate
- > recessed cargo tracks
- > can be combined with all flat interior surface layers
